

INVITRO CONNECT

GmbH

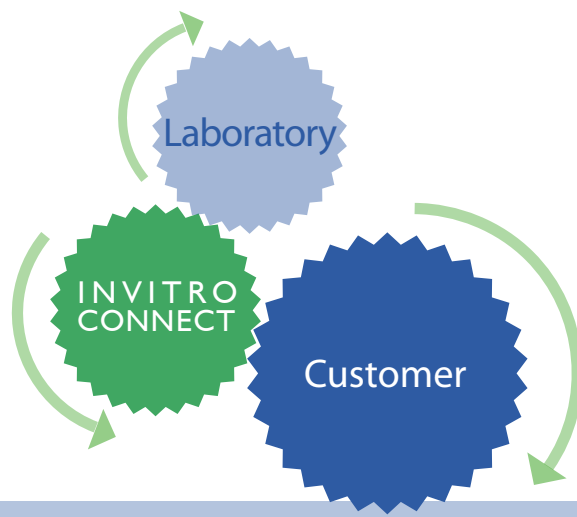

Your #1 Independent Provider of Laboratory Services

To the Pharmaceutical, Chemical and Cosmetic and Medical
Device Industries

Offices in Berlin • Cologne • Flawil • Basle

Ensuring Safety and Quality
for Your Products Worldwide!

The key issues for your company:

You need complex laboratory services that deliver ultra-high quality? You want to commission scientific analyses or tests on compounds and products?

How can you guarantee that you find the best service providers for each of the individual services you need?

How do you find the time to invite offers and compare them expertly?

How do you know that you will achieve the best price-performance ratio?

How do you find out who currently has free capacity to save you from waiting?

How do you keep updated on the current project and testing status?

Who compiles all your results into one dossier?

We do! We do all that and even more for you. We provide support right where and when you need it.

INVITRO-CONNECT GmbH offers you a full range of comprehensive services in the following areas:

- Chemicals
- Pesticides
- Biocides
- Cosmetics
- Medical devices
- Pharmaceutical active ingredients
- Veterinary pharmaceuticals

Our portfolio covers all tests and assays and documentation prescribed by the authorities.

INVITRO-CONNECT GmbH is your partner for:

Testing and assays at over 40 accredited test laboratories

Project management and study monitoring

Full-range of REACH-compliant laboratory services and management

New registrations under REACH and IUCLID 5

Preparing and updating safety data sheets

SVHC product testing / SVHC screening

In vitro analyses and tests

In-vitro concepts for efficient product development

INVITRO CONNECT

GmbH

Your #1 Independent Provider of Laboratory Services

The INVITRO-CONNECT GmbH: Every project ends in success

We take on the responsibility for ensuring that your project will be a success. This means that we organize and manage the full commission – from the initial talks to project conclusion.

Benefit from our know-how and our experienced network of partners: Scrupulously selected experts, toxicologists and more than 40 accredited testing laboratories with an over 20 years' track record in the industry.

Full-range project support from start to finish

Confidently place your entire project support in our hands: Coordination, study monitoring and GLP inspections at the affiliated labs. We supply the finalized test reports in the desired format – in digital or paper form. At the end, you receive a single invoice with an itemized and transparent statement of all services.

Speedy processing

We check with over 40 affiliated labs to ensure that capacity is available for your project. In the past, this method has proven to cut processing times significantly. At the same time, we make sure that all networked partners are working at full capacity – a policy that favourably affects prices.

Up-to-date project overviews

With updated testing and project overviews, we constantly keep you up-to-date on the latest status. You can access interim results at any time.

High-quality results

INVITRO-CONNECT GmbH puts together the right team for each project. Thanks to our familiarity with the labs and the experts, we commission those most suited for the specific service. That way we can guarantee high-quality results.

Attractive bottom line

Our experience has shown that testing and assay prices tend to vary greatly among the individual labs. Our concept lets us reduce prices by up to 30% on high-volume test batches. The bottom line: You have less work and lower costs.

At a glance: INVITRO-CONNECT GmbH

Who we are:

INVITRO-CONNECT GmbH is a Swiss company, established since 2006 in Herisau, the corporate headquarters. We maintain offices in Basel, Flawil, Berlin and Cologne. Our staff manages our customers' projects at the various locations and keeps in close contact with the labs and network of partners.
